

UNIVERSAL™ CLEANING PRODUCTS for MICROKERATOMES & SURGICAL INSTRUMENTS

UNIVERSAL™ CONCENTRATED SURGICAL INSTRUMENT CLEANER AND LUBRICANT

“The Safety and Efficacy you have been looking for in your Instrument Cleaner”

“Non-Enzymatic”

FDA Approved and CE Marked - Laboratory Tested & Clinically Proven to be **“Safe and Effective”** in Cleaning even the most delicate microsurgical instruments and equipment.

Antimicrobial • Rinses Residue Free
No Cytotoxicity • No Cell Lysis, Intracytoplasmic Granules

Named Cleaner of Choice by all Major Microkeratome Manufacturers

The Universal™ LASIK Instrument Care and Cleaning Kits.

Four different kits to choose from
to suit your individual practice.

Illustrated: LASIK Care Kit LCK 4

The Universal™ Visi-Plaque and Micro-Kleen® II Brushes

The Visi-Plaque Instrument Brush has 3 times the number of bristles to blot up cellular debris and contaminants from the surfaces of the instruments. The rounded bristles are designed to prevent scratches to the external surfaces of the microkeratome.

The Micro-Kleen® II Tapered Brush is designed to clean the recess areas of the microkeratome. This newly design brush has the **center wire** coated to prevent damage to the microkeratome.

Duo-Cell™ Bacteriostatic PVA Surgical Products

Duo-Cell™ “FDA Approved” Patented Technology Inoculates our Hydrophilic, High Density and Lint-Free PVA formulation with “Bacteriostatic Properties”. Duo-Cell™ inhibits the growth of microorganisms; highly absorbent PVA Material traps fluids and contaminants deep inside effectively reducing the risk of Bio-Burden Cross-Contamination during “EVERY” surgical procedure.
